

Quality Management - EN 9100

The sector standard recognised worldwide that will add wings to your success.

As a company in the aerospace industry you have to meet particularly high requirements for the quality and documentation of your processes. With DEKRA certification to EN 9100 you will prove your performance capability to customers and business partners with total clarity. At the same time, you will gain an essential admission ticket to the global market.

Sense and purpose of the EN 9100 standard

The EN 9100 ff series of standards was developed by the International Aerospace Quality Group (IAQG) on the basis of ISO 9001. It is applied worldwide by all leading companies in the aerospace industry as the quality standard for their suppliers. EN 9100 is identical in content with the American standard AS 9100 and the Asian standard JISQ 9100.

The aim of this international standard is to ensure the highest degree of efficiency and reliability for the processes within the supply chain and, as a result, prevent risks.

For this reason, the series of standards not only contains a set of rules for the design engineering, development, production, assembly and maintenance sectors (EN 9100), but also for maintenance organisations (EN 9110) as well as for traders and stockists (EN 9120).

What DEKRA offers you

To improve your processes, reduce costs and weaknesses and increase your competitiveness with sustained effect. Certification by DEKRA will bring you further advantages:

- ▶ Worldwide market access: Recognition by all relevant market participants
- ▶ Registration as a supplier with authorisation to access the worldwide OASIS database (Online Aerospace Supplier Information System)
- ▶ Active risk management: Reduction of warranty risks
- ▶ Easy integration with other management systems
- ▶ Flexible certification process taking your individual procedures into account

We will provide you with practical, uncomplicated and lasting support on all matters of certification. Neutrally and independently. Taking your specific goals into account.

The steps towards your successful certification

- 1 **Informative meeting**
 - ▶ Clarification of open questions
 - ▶ Joint establishment of the next steps
 - ▶ Project meeting or optional pre-audit
- 2 **Document review & audit on site**
 - ▶ Readiness analysis
 - ▶ Description of your management system
 - ▶ Quality capability towards your customers
 - ▶ Implementation of the documented statements in day-to-day business
- 3 **Audit report** with the following content:
 - ▶ In the event of inconsistencies suggestions for optimisation and reassessment
- 4 **Certificat & DEKRA seal**
 - ▶ Presentation of the certificate after successful certification
 - ▶ Award of the DEKRA seal for the term of your certificates

Annual monitoring to check that your management system is being upheld and further developed

Further services from which you can benefit

Use the DEKRA certification service for other sectors and systems too, such as ISO 9001, ISO 14001, SCC or OHSAS 18001. We are accredited for more than 40 standards internationally – and will be pleased to help you to combine the desired certifications, saving you expense and effort.

As a partner of the aerospace industry the DEKRA Group can also offer you numerous other services:

- ▶ Sustainability management, e.g. development of management systems
- ▶ Energy efficiency, e.g. classification of your consumption
- ▶ Training courses, e.g. for qualification as aviation safety assistant
- ▶ Person certifications, e.g. of data protection specialists
- ▶ Product testing and certification, e.g. testing of pollutants and materials

The DEKRA seal

Offer your customers reliability and quality - with our DEKRA seal!

The DEKRA seal stands for highest reliability - across different industries and internationally. It will create trust and give your customers the certainty of being on the safe side.

Our seal will be your strength. Use it as an image bearer and marketing tool. We will be pleased to help you.

 **DEKRA**
Alles im grünen Bereich.
